Alexei Grosul

Product Designer & Head of Design

● Open to Product Designer and Design Lead roles

PROFILE

16 years in tech. I get involved at every stage — from the first meeting to launch and metrics. At Zeroqode I grew from developer to engineering team lead to Head of Design, and now lead a team of 8 designers. I understand APIs and databases, so I design what the team can ship on time, and I build AI into the workflow to speed up expertise, not replace it.

+50% faster design delivery with AI workflows

EXPERIENCE

Head of Design · Zeroqode · Chișinău

Mar 2019 — Present

No-code Developer → Engineering Team Lead → Head of Design

STRATEGY & DIRECTION

- Set the design direction for the company and the UX/UI quality standards for all client and internal products.
- With marketing, analyse the market and competitors and shape the company's positioning and visual strategy.
- Launch internal products from idea to release: research, concept, design and coordination of development.

AI & PROCESS

- Brought AI tools into design and development to shorten the cycle from idea to working product — design delivery became ~50% faster.
- Built the team's workflow: handoff to engineering, design reviews, standards and design systems.
- Work in a Figma → code loop with AI assistants to prototype interactive solutions quickly.

TEAM

- Lead a team of 8 designers: hiring, task setting, reviews, mentoring and career levels; run regular one-on-ones.
- Run internal trainings on AI tools and modern design practice; coordinate design with partner agencies.
- Responsible for UX/UI of web and mobile products, including AI products, for clients in the US, Europe and beyond.

EARLIER AT ZEROQODE

- **Engineering Team Lead** — led a team of developers, planned work and owned deadlines, ran code reviews and owned app quality and architecture.
- **Developer** — built web apps and MVPs for clients.
